Technical Skill Set

Frontend: HTML, CSS, JavaScript, TypeScript, React, Vue.js, Next.js, Nuxt, Tailwind CSS

Backend: Node.js, MongoDB, Python, Flask, Supabase, PostgreSQL

Testing: Vitest, Jest, Cypress

Tools: Docker, Git, GitHub, Postman, Swagger/OpenAPI, Figma, Excel, VBA

Relevant Experience

Software Engineer	Industrial Medical Services Company (Nigeria) Limited	<i>May 2026 - Present</i>
- Designed and built an administrative system automating the generation of tax, pension, payout, payroll and payslip spreadsheets in Excel. - Developed a payslip generation system using Python and VBA to automate monthly document production and dissemination. - Designed and built a web-based monthly reporting system using Typescript, Netlify and Supabase, replacing a manual report-collection workflow.		
Software Engineer	CreativityKills (Remote)	<i>March 2025 - July 2026</i>
- Designed and built UI for a bookmark Chrome extension using Nuxt.js. - Designed and built UI for a budgeting web application using Next.js.		
Software Engineer Apprentice	Agile Learning Institute (Remote)	<i>Jan 2024 - Jan 2026</i>
- Contributed to Mentor Hub, a language-agnostic cloud platform for managing the institute's mentoring operations; closed 15 pull requests across 7 repositories. - Built the UI for a microservice using Vue.js, Typescript, and Material Design, focusing on responsive design, cross-browser compatibility and clean code. - Built the API for a microservice using Flask and Gunicorn; used PyInstaller to bundle the API as an executable when building the Docker image, ensuring separation of concerns between source code and containerization.		
Freelance Frontend Developer		<i>May 2023 - Apr 2025</i>
- Designed, built and deployed fully functional, responsive websites based on client specifications using Figma, React, Typescript and Tailwind as well as low-code platforms like Wix and Webflow, ensuring cross-browser compatibility and accessibility compliance. - Managed the full development lifecycle, including requirements gathering, design, development, deployment, and maintenance or site handoff for 4+ client projects with timely delivery and positive feedback.		

Frontend Developer Intern**HNG Internship (Remote)***Oct 2022 - Dec 2022*

- Contributed to the development and launch of an audio transcription web app with the product's first client organization secured within the first week of product launch.
- Led a 5-person team contributing to Zuri Chat, an open-source Slack alternative; assigned tasks according to the strengths of my team members, closed 2 high-priority issues.
- Collaborated with members of the design and backend teams; developed mobile-first, responsive web pages, assisted in reviewing pull requests and merged 22 pull requests.

Software Engineer Intern**Dork Discovery (Abuja, Nigeria)***Jul 2021 - Apr 2022*

- Organized, led, and drew up a curriculum for a web development boot camp with 20 registered students. Bootcamp ads boosted the company's online presence, gaining 100 new followers across accounts.

Personal Projects**Daily Bingo**<https://dailybingo.knwauwa.dev>

A pastime web app for curating and sharing random or custom bingo cards. The project features identity and access management, offline storage, and profile management. Built with Nuxt 3 and MongoDB. Deployed on Netlify.
